# Multichannel Micro-embedded Transceiver

## Description

XTR-903-Ax radio transceiver represents a simple and economic solution to the problem of wireless data transmission: the employment of an embedded microprocessor allows a transparent TTL RS-232 throughput without any need of packaging and data encoding, avoiding user to write complex software routines for the transmission management.

It's possible to set up input serial speed (9600-19200-38400 bps) by means of two input lines (SP1 e SP2) and it is automatically assigned a different degree of redundancy and protection on the forwarded RF packet depending on the selected speed: Hamming+Manchester at 9600 bps, Manchester at 19200 bps and Scrambling at 38400 bps.

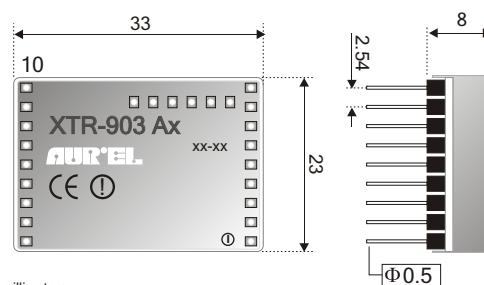

This module is a multichannel transceiver which enables 10 channels at 434 MHz, 7 at 868÷870 MHz and up to 169 channels on the 902÷928 MHz american band.

Supply voltage is 3V stabilized and it is provided for the transceiver to switch to power down mode, reducing current consumption to less than 10 $\mu$ A.

## Applications

Gate door openers, Burglar alarms, Car alarms, Personal security, Home security, Remote controls.

## Mechanical Dimensions

■ All dimensions are in millimeters

## Pin-out

|            |           |
|------------|-----------|

## Specifiche Tecniche

| Caratteristiche |   | Ta = 25 °C          |        |     |
|-----------------|---|---------------------|--------|-----|
|                 |   | Min                 | Typ    | Max |
| V <sub>s</sub>  | Tensione di alimentazione                                       | 2.7                 | 3      | 3.3 |
| I <sub>s</sub>  | Corrente assorbita (RX mode)                                    |                     | 26     |     |
| I <sub>s</sub>  | Corrente assorbita (TX mode @ -8 dBm)                           |                     | 20     |     |
| I <sub>s</sub>  | Corrente assorbita (TX mode @ 10 dBm)                           |                     | 31     |     |
| I <sub>s</sub>  | Corrente assorbita (Stand-by mode)                              |                     | 8      | 10  |
| M <sub>o</sub>  | Tipo di modulazione   |                     | FSK    |     |
| S <sub>i</sub>  | Sensibilità in ricezione  |                     | -105   |     |
| P <sub>TX</sub> | Max potenza emessa (Tx)   | -8                  |        | 10  |
| R <sub>IN</sub> | Bit rate in ingresso <sup>(1)</sup>                             | 9600, 19200 e 38400 |        |     |
| O <sub>r</sub>  | Outdoor range   |                     | 200    | m   |
|                 | Canale XTR-903A-4 (default senza programmazione) <sup>(2)</sup> |                     | 433.96 | MHz |
|                 | Canale XTR-903A-8 (default senza programmazione) <sup>(2)</sup> |                     | 869.87 | MHz |
|                 | Canale XTR-903A-9 (default senza programmazione) <sup>(2)</sup> |                     | 915.07 | MHz |

<sup>(1)</sup> Il segnale in ingresso si intende composto da 1 start bit, 8 bit di dato ed uno stop bit, senza parità.

<sup>(2)</sup> I valori di default si intendono senza necessità di programmazione con comandi AT.

## Technical Specification

| Characteristics |   | Ta = 25 °C          |        |     |
|-----------------|---|---------------------|--------|-----|
|                 |   | Min                 | Typ    | Max |
| V <sub>s</sub>  | Supply voltage  | 2.7                 | 3      | 3.3 |
| I <sub>s</sub>  | Supply current (RX mode)                                |                     | 26     |     |
| I <sub>s</sub>  | Supply current (TX mode @ -8 dBm)                       |                     | 20     |     |
| I <sub>s</sub>  | Supply Current (TX mode @ 10 dBm)                       |                     | 31     |     |
| I <sub>s</sub>  | Supply current (Stand-by mode)                          |                     | 8      | 10  |
| M <sub>o</sub>  | Modulation type   |                     | FSK    |     |
| S <sub>i</sub>  | Receiver sensitivity                                    |                     | -105   |     |
| P <sub>TX</sub> | RF Power out (Tx)                                       | -8                  |        | 10  |
| R <sub>IN</sub> | Input Bit rate <sup>(1)</sup>                           | 9600, 19200 & 38400 |        |     |
| O <sub>r</sub>  | Outdoor range   |                     | 200    | m   |
|                 | XTR-903A-4 channel (without programming) <sup>(2)</sup> |                     | 433.96 | MHz |
|                 | XTR-903A-8 channel (without programming) <sup>(2)</sup> |                     | 869.87 | MHz |
|                 | XTR-903A-9 channel (without programming) <sup>(2)</sup> |                     | 915.07 | MHz |

<sup>(1)</sup> Input signal has to be made up of 1 start bit, 8 data bit and 1 stop bit, no parity.

<sup>(2)</sup> Default values are provided without AT commands programming.
